Drawings

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because drawings are hand written. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: Claims 1 and 3-12 are considered allowable since when reading the claims in light of the specification, none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claims. As to claims 1, 3-5, the prior art of record does not teach a message (201) is sent from the central unit's network interface (107) to the terminal, indicating the signaling protocols supported by the central unit, in response to an answer message (202) sent by the terminal indicating the terminal's selection for signaling protocol, a connection is established (203, 204) between the central unit's network interface (107) and the

central unit's signaling unit (105) that supports the signaling protocol chosen by the terminal.

As to claims 6 and 7, the prior art of record does not teach in response to a message (201) sent by the central unit's network interface (107) indicating the signaling protocols supported by the central unit, an answer message (202) is sent from the terminal's interface (109) indicating the signaling protocol selected by the terminal when the terminal supports a signaling protocol mentioned in the message, or the incapability of the terminal of supporting a protocol indicated in the message when the terminal does not support any one of the signaling protocols mentioned in the message.

As to claim 8, the prior art of record does not teach a signaling unit selected by the central unit, the central unit being adapted to select a signaling unit after having received the indication from the terminal. As to claims 9 and 12, the prior art of record does not teach sending a message to the central unit including a code for signaling protocol support and an associated value which is a binary number and in which each bit represents a particular signaling protocol and in which the bits that represent protocols that cause a conflict are set.

As to claims 10 and 11, the prior art of record does not teach in the central unit, means for indicating to the terminal the signaling protocols supported by the central unit and means for setting up via the central unit's network interface a signaling connection using a selected signaling protocol between the central unit's signaling unit and the terminal, and in the terminal, means for indicating to the central unit the capability of the terminal of supporting a particular signaling protocol in response to a message sent by

the central unit. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
